## MAD about Science

Our students enjoyed the models and projects making related to their classroom learning. They were most engaged in creating and ideating these projects. Experiential learning provides better understanding of topics.

Plant & animal cell

Types of teeth

Rain water harvesting

## Community outreach

Our grade 8 students went to near by village on World Literacy day to spread awareness on importance of reading and writing.

## Maths Mania

Topics like fractions and Tangram were covered in maths by doing a collage art work. Students of Middle school understood the concept when they were given the pieces like a jigsaw puzzle only here they were free to let their imagination run wild!

## Magic show

Everyone will have their own interpretations of what magic is, but for me personally it's not a trick or illusion-it's an unforgettable experience, for me its life.

Famous Magician AD from Bhopal visited campus and entertained students with spell binding shows.

## Parent counselling session

An online session was conducted with Dr. VS Ravindran for parents on the topic "Parental Concerns on Problem of Aggression in Children".

## Learning became fun

How does voting work for a large country like India?  
What is a volcano and why does it erupt?  
How do I find a continent on Map?  
What is a globe and why do we need it?

These are the questions our students in Middle and High school have tried to answer by actually experiencing it. For eg a dummy election was held and they cast their vote just like in the real world. What better way than to show and tell!

## Calligraphy workshop
